

■ KisanConnect — Complete Project Codebook

Direct Farm-to-Consumer Organic Marketplace • Complete Source Code & VS Code Execution Manual

Project: KisanConnect

Tech Stack: HTML5, CSS3 Grid, JavaScript (ES6+), Chart.js

Design: Nordic-Organic Bento-Grid

Target Browser: Google Chrome (Zero Setup Needed)

Files Included: 5 Complete Files

License & Status: MIT • 100% Functional Demo

■ 1. How to Setup & Paste in Visual Studio Code (Step-by-Step)

STEP 1: Create the Exact Project Directory Structure on Your Computer

1. Create a new folder named **KisanConnect** on your Desktop or in Documents.
2. Inside the KisanConnect folder, create a subfolder named **data**.

Your directory structure must match this layout exactly:

```
KisanConnect/  
■■■ index.html           (Main Web Page)  
■■■ style.css            (Nordic-Organic Styling)  
■■■ app.js               (Price Engine & Interactivity)  
■■■ data/  
    ■■■ listings.json    (Farm Produce Seed Data)  
    ■■■ market_prices.json (Mandi & Retail Benchmarks)
```

STEP 2: Open VS Code and Create the 5 Files

1. Open **Visual Studio Code** on your laptop.
2. Click **File → Open Folder...** (or press Ctrl + K, Ctrl + O) and select your KisanConnect folder.
3. In VS Code's left Explorer panel, create the 5 files:
 - Click **New File** → type index.html (save in main folder)
 - Click **New File** → type style.css (save in main folder)
 - Click **New File** → type app.js (save in main folder)
 - Right-click data folder → **New File** → type listings.json
 - Right-click data folder → **New File** → type market_prices.json
4. Copy the exact code from each section of this PDF into its respective file and press **Ctrl + S** to save.

■ 2. How to Open and Run in Google Chrome

METHOD A: Double-Click File (Easiest — 5 Seconds)

1. Open Windows File Explorer and navigate into your KisanConnect folder.
2. **Right-click** on index.html.
3. Select **Open with → Google Chrome**.
4. KisanConnect will immediately run in Chrome with full interactivity!

METHOD B: VS Code Live Server (Best for Editing)

1. In VS Code, press Ctrl + Shift + X to open Extensions.
2. Search for **Live Server** and click **Install**.
3. Right-click anywhere inside index.html.
4. Click **Open with Live Server**.
5. Chrome opens automatically at http://127.0.0.1:5500.

■ 3. index.html — Complete Frontend Markup

File Path: index.html • *Place this file directly in the main `KisanConnect` root folder.*

```
